Product Introduction

Closed Delivery Robot/IIMT-DR-02

0 salary | No rest | No complaints

Multi sensor navigation obstacle avoidance, integrating fun, safety, and intelligence, flexible operation, upgraded human-machine .

Ultimate obstacle avoidance pass rate ±50mm

01.Simple interaction

Voice and touch screen dual channel interaction, simple and convenient operation.

02.Precise intelligent control

Multi sensor fusion technology, adapted to different application scenarios, achieves precise positioning.

03.Infrared intelligent return

Infrared object perception, detecting the status of item retrieval, and autonomously returning to the original

集萃智造 JITRI INTELLIGENT MANUFACTURING

Product function

- Human computer interaction
- Agile obstacle avoidance
- Intelligent delivery
- Automatic return to recharge pile

Parameter

Size	505mm*505mm* 1000mm
Weight	67kg
Driving Wheels	2 Wheels driving
Navigation System	Laser, IMU, Encoder, multi-sensor positioning and navigation
Tray Size	404×457mm per tray
Max crossing height	2cm
Maximized Running Speed	0-1.5m/s
Max climbing angle	≤5°
Battery Size	350*340*150mm
Battery Weight	5kg
battery type	24V,50Ah,Li-batter
Standby time	>24h
running capacity	8h continuous work
Collision Avoidance System	Multisensor Obstacle Avoidance for Stereo Vision, Ultrasonic Wave, Collision Strip, etc
Stand-by power	<25w
Charging method	Auto charging and wire charging
Network	wifi/4G
Touch Screen	10.1 touches screen, 800*1280 resolution, 16:10 262*176*36mm
